

Year 7 Science Curriculum Overview

At KS3 we start with a year of Science skills taught within some basic science topics. This prepares our very academic students with the necessary skills to target the more detailed KS3-5 curricula that are introduced from Year 8. This first year allows students to focus on how to process information and develop key scientific skills. The year gives a brilliant basis for the rest of the time in Science at Tiffin and the students finish desperate to further their understanding of the topics they have been introduced to.

Year 7 Science Curriculum

Autumn Term 1	Lab skills and Chemical reactions
Autumn Term 2	Cells
Spring Term 1	Waves
Spring Term 2	Rates - how fast?
Summer Term 1	Physiology
Summer Term 2	Energy
